TELEGRAPHIC SUMMARY.

Washington, Nov. 9.—Fisher, Com-missioner of Patents, has resigned. The Democratic Congressional Commit-

tee have advices from Illinois that the Democrats gain the Fifth, Eighth and probably the Twelfth Districts, and reduce the Republican majority by thirty thou-

The President has authorized the publication of the correspondence which passed between him and ex-scretary Cox, last August, relative to the claim of McGarrahan to the quicksilver mines claimed by the New Ideria Company. The President's

"As the matter had been taken in hand by Congress before the incoming of this administration, and as so much fraud is charged and believed to exist on both sides, I am not willing my name should be signed to a patent for either party until Congress has either decided or declared their to Mr. White, Secretary for signing patents, not to put my name to that one except on special orders from me through you.

The next day Cox wrote a long reply,

denying that Congress had assumed peculiar jurisdiction of the subject, and asserting, for reasons stated, that Metiarrahan votin stands before the Department as a fearallent claimant, who has been foiled and condemned in his fearal by the highest court of the nation, and whose efforts to provure favor from Congress have also fall-ed. He concludes by saying: "For my-self, as I am conscious of having only fought fraud with such vigor as I could. I can make no compromise, and if I fail to secure, to the fullest extent, your approval of my course, I must beg you to relieve me at once from duties which,

out your support, I shall usterly sail is."

The President notices the last part of this letter, to show that prior to Ootober, when Cox sent in his resignation, he asked to be relieved from his office, and hence the reasons he assigns for his resignation in October were not the true ones. The President, through the newspapers, but without his signature, also alludes to that part of Cox's letter implying that Grant would not support him in carrying out civil reforms. The President refutes that by saying that all persons appointed have to undergo an examination as to qualification, the preference, of course, being given, all things being equal, to friends of the Administration. He inaugurated the pol-icy of appointing Indian Agents from the various religious societies, and to this the public may be assured he will adhere.

A Tribane special from Paris, of the 6th,
enys: "The news that the armistice had
been rejected tell like a thunderbolt upon
the populace. I never remember to have
witnessed such general gloon since the
commencement of the slege. The feeling
of despair is, I fear, still stronger in the
army. My impression is that within a
short time there will be an outery for peace
which no government will be sble to resist,
If the real condition of France is made
public, the impossibility of further resistance will become even more evident."
Lyons is preparing for defense, and
Toulose is sending forward large numbers
of troops, fully armed and equipped. Order prevails in both cities, and also at Marsailles, whose internal dissensions have
disappeared.

The Herald's correspondent has interviewed Napoleon, and says he was not betrayed; his disaster was the result of mutrayed; his disaster was the result of mu-tual and general self deception. Napoleon has no ambition for his own title for his son's restoration. He thinks his son will be happier in private station, and hates the Republican laws of France—France needs peace. ARCADIA, TENN., Nov. 9, 1870. To the Editors of the Chronicle:
The election passed off quietly—the Democrats polling their full—trength, and the

Republicans hardly half.
Cross, Democrat, is elected Representative; he had no opposition.
At Arcadia the following was the result For Governor, Brown received sixteen, and

Wisener forty-eight votes. For Congress, Whitesixteen, and Butler forty-eight votes; State at large, Netherland eleven, and Rodgers forty-seven votes. For State Senate, Sevier sixteen, and Patton fortyseven votes.

Full returns from nearly every district makes Brown and White's unjority about eight hundred.

Taylor gets only twelve votes in the county. Sevier is no doubt our next Senator, beating Patton and Snodgrass.

HENRY.

Tools for the Boys.—Many boys are driven away from learning useful trades, and gravitate into the useless life of measuring ribbons and laces, because they have had, during boyhood's first desires, no tools to employ their hands with in idle hours. Many would retain tastes halfformed if some such means were employed to fasten his attention upon them and turn his mind in such a channel. Every man who can afford it should supply his boys with tools, and a room where they may be used and cared for. A boy takes to tools as naturally as to green apples or surreptious and forbidden amusements, and if he has a chance to develop his mechanical tastes, and gratify them to their fullest extent, his tendencies to vicious courses will also remain undeveloped. Such a result is enough to compensate for all the expense and trouble the indulgence we recommend would entail, while the chances that the early development of his constructive faculties may, in this mechanical age, be the means by which he may ultimately climb to tame and fortune are not small.

This is a fair specimen of the vengeance This is a fair specimen of the vengeance with which they commit suicide in Kansas City. A man in the third story of a hotel fastened one end of a leather strap around his neck, and tying the other end to a bed post, sat far out on the window sill and shot himself. The wisdom of this plan is evident, from the fact that if the shot failed, he would have fallen out of the window and be hagned by the strap, and if the strap broke he would have goue to the pavement and been a lad mess for the the pavement and been a bad mess for the undertaker.
